SUMMARY

As an experienced backend developer with a background in computer science engineering, I possess a robust skill set in designing and maintaining efficient server-side applications and databases. My expertise includes a strong foundation in various programming languages, frameworks, and database technologies. I am driven by a passion for creating scalable and reliable backend systems, and I am eager to leverage my skills to build high-performance solutions that meet complex business requirements.

EXPERIENCE

- Backend Developer (Full-Time), OrtmorAgency, Kochi, Kerala** Sep 2024 - Present
- A complete marketing and technology agency specializing in digital and experiential marketing to grow brands and businesses.
 - **Roles & Responsibilities:** Handled backend development, database management with SQL and NoSQL, email integration, and managed Cloudways hosting operations across different staging environments.
 - **Technologies Used:** Utilized Node.js, MongoDB, MariaDB, Prisma for database management, Kafka, GRPC, Stripe, Razorpay, Socket and integrated email services with Nodemailer, SendGrid and AWS SES.
- Backend Developer (Freelance), OrtmorAgency, Kochi, Kerala** Mar 2023 - Feb 2024
- A complete marketing and technology agency specializing in digital and experiential marketing to grow brands and businesses.
 - **Roles & Responsibilities:** Handled backend development, database management with SQL and NoSQL, email integration, and managed Cloudways hosting operations across different staging environments.
 - **Technologies Used:** Utilized Node.js, MongoDB, MariaDB, Prisma for database management, and integrated email services with Nodemailer and SendGrid.
- Backend Developer (Freelance), TrentIt India Private Limited, Bangalore, Karnataka** Sep 2022 - Mar 2023
- Developed and maintained a platform for buying and selling second-hand products, focusing on creating a seamless user experience for transactions.
 - **Roles & Responsibilities:** Managed backend development, including database design, hosting, and application management.
 - **Technologies Used:** Utilized Node.js with Express framework, managed databases with MongoDB, and employed hosting services like DigitalOcean and AWS S3.
- Backend Developer (Freelance), Satmaya Digital Haripad, Kerala** Sep 2021 - Sep 2022
- A software development company specializing in various software solutions and services.
 - **Roles and Responsibilities:** Fixed bugs in the backend, added additional features, & managed hosting raja server operations.
 - **Technologies Used:** Utilized Node.js and Express for backend development, Twilio for communication features, MongoDB and Firebase for database and push notifications.

TECHNICAL SKILLS

Programming: JavaScript, Typescript, Python, Java, Go, C, Bash.
Libraries & Frameworks: React.js, Next.js, Express.js, Nest.js, Flask, Django, Mongoose, Prisma, Tailwind CSS.
Tools: Git Version Control, Nodejs, Docker, Kafka, GRPC, Docker, VS Code, Figma, Postman, Microsoft Excel, Microsoft Word.
AI Tools: Antigravity, Github Copilot, Claude Code.
Database: MySQL, MongoDB, Redis, Firebase Firestore.
Operating System: Linux (Ubuntu, Parrot Security, Kali Linux), Windows, Windows Server.
Cloud Computing Platforms: AWS EC2, GCP, Digital Ocean, Plesk, Hostinger, Azure, Hostingraja.

EDUCATION

B.E Computer Science and Engineering Anna University, Tamilnadu, India	Mar Ephraem College Aug 2020 - Jul 2024
--	--

CERTIFICATIONS

Certified Ethical Hacker (CEH) MASTER Cyber Security	EC Council Sep 2025 - Sep 2029
Certified Penetration Tester (CPT) Cyber Security	Red Team Hacker Academy Aug 2020 - Jul 2024

COURSES

Docker, Guvi

October 2023

- Covered the fundamentals of Docker, focusing on containerization, image creation, and deployment techniques.
- Learned to work with Docker objects including images, containers, registries, volumes, Docker Swarm, and Docker Compose.
- Developed a website, hosted an image file on Docker Hub, and utilized Dockerfile and Docker Compose for DevOps processes.

Full Stack, Infosys Spring Board

March 2023

- Focused on the MEAN stack (MongoDB, Express, Angular, Node.js) for full-stack development, covering both frontend and backend technologies.
- Developed a Book Store Application that supports selling and purchasing books through the platform.

PROJECTS

Gym Stream, Ortmor Technology Agency Pvt Ltd (GymStream Private Limited)

Nov 2025 - Present

- SaaS-based fitness streaming platform delivering scheduled workouts with multi-tenant support, subscription management, and secure payments via Stripe and Razorpay, built on a microservices architecture with services for notifications, email, activity tracking, subscriber management, and core application logic.
- **Roles & Responsibilities:** Built and maintained a scalable microservices backend with REST, gRPC, Kafka, real-time Web-Sockets, payment integrations (Stripe/Razorpay), and cloud infrastructure (AWS, DigitalOcean, FCM).

CommentJet, CommentJet

Jan 2024 - Aug 2024

- CommentJet is a versatile platform that empowers designers to seamlessly share design files, collaborate, and provide valuable feedback. Streamline your design workflow with effortless file sharing, interactive commenting, and real-time collaboration.
- **Roles & Responsibilities:** Managed backend development including MongoDB NoSQL design, Docker containerization, AWS S3 integration, and ensured secure and efficient hosting.

Infinity Saudhi & Qatar, VectorCrop

May 2024 - Jul 2024

- An e-commerce platform enabling retailers to inquire about bulk quantities of products across various categories for their sales needs.
- **Roles & Responsibilities:** Managed backend development using MongoDB for efficient data handling and system operations.

Royal Technology Solution (UAE), Ortmor Agency

Aug 2023 to Feb 2024

- Royal Technology Solutions offers comprehensive technology solutions to businesses globally, focusing on delivering innovative and reliable services across various sectors.
- **Roles & Responsibilities:** Developed an admin and backend CMS for the company's portfolio using MariaDB and Prisma. Managed the hosting of the website on Cloudways, ensuring proper configuration for different environments.

BMW M FESTIVAL JEDDAH 2023, Ortmor Agency

Apr 2023 to May 2023

- A portal for event registration, allowing attendees to register for events in Dubai. The system generates invitation QR codes for general attendees and VIP QR codes for VIP contacts. It supports attendance tracking during the event and generates pre- and post-event reports.
- **Roles & Responsibilities:** Developed and managed the backend for the event management portal, including implementing QR code generation, managing VIP and general attendee data, and ensuring accurate attendance tracking and reporting.

TrentIt Reselling Marketplace and E-Commerce Platform, TrentIt India Private Limited

Sep 2022 to Feb 2023

- An online marketplace for reselling used goods, featuring a platform where users can list and purchase products with transparency regarding the product's condition.
- **Roles & Responsibilities:** Managed backend development, including database design with MongoDB, and handled application hosting and maintenance.

Easydeed Food Delivery Application, Satmaya Digital

Sep 2021 - Feb 2022

- Easydeed is a food delivery application that facilitates users in ordering food from various restaurants and tracks the cooking and delivery process.
- **Roles & Responsibilities:** Handled backend development to resolve issues and implement new features, ensuring improved application performance and user satisfaction.
